

# PVC clip on profile for Al starting set

- perfect finish of plaster at the base of the ETICS system
- a strong linkage to Al base profiles
- eliminates cracking and damage at the base of the ETICS system
- easy installation
- built over the joints of Al (aluminium) base profiles leads to a strong linkage between both profiles
- draining of water from plaster
- avoid capillary action of moisture beneath the plaster
- increase the lifetime of the insulation system ETICS

Material	Dimension	Ordering No.	Length	Packing
	mm		m	pcs
PVC	3	D/40.1	2,5	20
PVC	6	D/41.1	2,5	20

## Recommendation:

Fit the profile to installed Al base profile. We recommend to use this profile to bridge the contact point between Al base profiles. Press glass fibre mesh into the applied adhesive. Smooth the adhesive, which squeezes through the mesh, using a stainless steel builder's float. Finish the surface-wide reinforcement at the edge of the fold in the profile.

## Storage:

A horizontal storage position is recommended. The profiles need to be stored in a dry place. Maximum recommended storage time is 24 months.
